

Demonstrating biodiversity in viticulture landscapes

The BioDiVine fathoms out the interest in reinforcing landscape structures in vineyards to favor biodiversity restoration.

The project focuses on the management of 7 key areas and a reference site In France, Saumur-Champigny:

<http://www.biodivine.eu/>

Saumur-Champigny

1. Limoux

2. Costières de Nîmes

3. Saint-Émilion

4. Penedès

5. La Grajera

6. Alto Douro

7. Bourgogne

The BioDiVine is a LIFE+ demonstration project

LIFE+ is the European financial instrument for the environment and aims at co-funding actions in the field of nature conservation, especially demonstration and/or innovation projects contributing to the implementation of the objectives of the Commission Communication called: "Halting the loss of Biodiversity by 2010 – and beyond".
